Subject: Microsoft Settlement

Dear DOJ,

Especially now more than ever should one corporation hold a stranglehold on what is arguably the most important industry in the world?Especially a company whose record of security and shady business practices be allowed to run free to devour and destroy other companies.Microsoft makes Standard Oil look like a bunch of choir boys.The time is right for not a slap on the wrist-or worse yet help in controlling the education sector-but a comprehensive and severe crackdown on this company.It is time for Microsoft to be punished for their morally,ethically and I believe in some regards down-right criminal behavior.

Thank you for listening,

James F.Myers Jr.
